

NEW DIRECTOR OF LAW ENFORCEMENT OPERATIONS

NITV Federal Services (NFS) is pleased to welcome Detective Jerry Crotty as its Director of Law Enforcement Operations. Jerry will oversee all aspects of law enforcement operations for NFS and provide direct advice and assistance to law enforcement agencies worldwide, as well as oversee our Technical Services Division.

Jerry joins the NSF team from the Manatee County Sheriff's Office in Florida where he served for 20 years in various positions, including supervisory positions in such specialized disciplines as Crimes Against Children, Domestic Violence and Internet Crimes Against Children (ICAC). While assigned to the State and Federal ICAC Task Force, Jerry developed ground-breaking techniques for using the CVSA[®] to identify and bring to justice serial child predators, which are now taught nationally. These techniques were so significant and effective that in 2015 he received the National Association of Computer Voice Stress Analysts (NACVSA) annual Professor James L. Chapman Award for Excellence. Jerry is considered an expert in interviewing and interrogation and has a confession rate well above 95%. He is also an expert utilizing the CVSA and is highly experienced in conducting specialized covert and structured examinations. Jerry holds a Master's Degree in Science from the University of Central Florida.

Charles Humble, Founder of NITV Federal Services and the developer of the CVSA, states "We are very excited to have an individual with the qualifications and strong moral character of Jerry Crotty joining our team. With his law enforcement background, especially in the ICAC arena, Jerry will bring a new dimension to an organization that is already recognized as the Gold Standard for our industry."
